DOREEN WANGECHI

Junior front-end web developer

Nairobi, Kenya • +254-704-604-434 • Email • Linkedin

Enthusiastic and dedicated Junior Front-End Developer with a passion for crafting engaging user experiences and bringing creative designs to life while keeping scalability and inclusivity in mind. I am deeply curious about emerging web technologies and committed to continuous learning to stay abreast of the latest trends in the field.

Specializes in ReactJS, Javascript, Responsive Design and Figma.

WORK EXPERIENCE

UX DESIGNER   Nov 2022 - Feb 2023
Vesen Computing

- Spearheaded the design process from User Empathy to testing.
- Took part in client meetings and consulted about the trajectory of their products.
- Enforced the UI/UX design principles.
- Collaborated with Graphic designer in charge and the development team to create simply amazing websites.
- Increased efficiency and a timely delivery of projects by 20%

PERSONAL PROJECTS

CRUD App   Oct 2023 - Nov 2023
Vanilla Javascript Project

- Using Vanilla JS, I created a to-do list that allows users to add tasks, edit the tasks and even delete the tasks.
- Added localStorage functionality allowing for storing and retrieving of data in user local storage.
- I learned about data structures, localStorage, closures and CRUD operations.

CV Builder   Nov 2023 - Dec 2023
 ReactJS Project

- Using the ReactJS library, I created a program that creates a Curriculum Vitae based on data entered by the user.
- I learned about components and handling inputs in react.

Shopping Cart   **Jan 2024**
ReactJS Project + API + Redux

- I created a responsive website, consuming a fake API and displaying products that users can add to cart.
- I used Redux for state management and TailwindCss for styling.
- I learned about react-router, redux and working with APIs.
